DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Voorhees on August 10, 2005.

The application has been amended as follows:

- a. Claim 2 cancelled
- b. Claim 1, Line 10 delete “.”
- c. Claim 1, Line 10, following “cover plate”, insert -- , wherein said LED is a multi-color LED and said cover plate having a manually operable switch mounted thereon whereby said switch includes a plurality of positions with each of said positions corresponding to a different color of light emitted from said LED such that by moving said switch from a first position to a second position, the color of light emitted by said multi-color LED can be changed. --
- d. Claim 14, Line 10, following “therethrough”, insert -- , said face including an electrical outlet --

Allowable Subject Matter

2. Claims 1, 3-12, and 14-22 are allowed.
3. The following is an examiner's statement of reasons for allowance:

4. With regards to Independent Claim 1, the applicant has sufficiently amended and narrowly defined an electrical component cover plate, wherein a translucent cover plate with reflective inner surfaces has a quick connect/disconnect multi-colored LED mounted thereon, and whereby a manually operable switch is mounted on said cover plate to provide a plurality of positions corresponding to a different color of light emitted from said LED. The prior art fails to teach or suggest the combination of structural elements disclosed and claimed herein, and all subsequent dependent claims are allowed.

5. With regards to Independent Claim 14, the applicant has sufficiently amended and narrowly defined an optical conductor electrical outlet, wherein a cover plate has interior reflective wall surfaces, an LED mounted to one of said walls, and a transparent/translucent face mounted to said cover plate and including an electrical outlet. The prior art fails to teach or suggest the combination of structural elements disclosed and claimed herein, and all subsequent dependent claims are allowed.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
